

honor 7A Fact Sheet

1. Face Unlock¹ and Fingerprint sensor – unlock your phone with ease

- You can now unlock your phone by simply looking at it, without having to key in a password or scan your fingerprint. Face Unlock is fast and convenient compared to other unlock methods. Honor is one of the first mobile brands to bring this advanced feature to the budget smartphone and adds convenience to everyday use.
- The Face Unlock function uses 1024 sets feature dimensions to capture your face and encrypt the data via local Trust Zone in order to increase accuracy and security.
- To further improve protection, you can enable smart notification. On a locked screen, the smartphone will not show any notifications unless it recognizes your face.
- On some occasions, people may not find face unlock convenient. For example, when a nurse wears a mask in a hospital. The Honor 7A integrates a fingerprint sensor to provide you one more option to quickly unlock your phone. It also supports mobile payments authentication in various Apps.

2. 13MP High-definition Rear Camera – professional photography

- Honor 7A is equipped with a 13MP rear camera which captures people and scenes in high definition, bringing exceptional photo quality to budget phone users. The high-definition camera can enable you to capture every moment of your life with clarity and perfection.

3. 8MP Front Camera with Selfie Toning Light – look better, more fun

- Do you know more and more selfies are taken in the evening? That's why the Honor 7A has a 8MP front camera with a selfie toning light built in – making your selfie look better, even at night, and enabling even more fun with your friends.
- The Honor 7A not only has a selfie toning light, but the brightness of the light can also be adjusted in order to provide the best effect for your photos.
- The beauty mode helps beautify people in your photos or your selfies. It makes natural corrections on your face and around your eyes, ensuring you look great in front of your friends.

¹ Face unlock feature will be provided by an OTA update

4. 5.7 inch Honor FullView Display – maximize your view with comfortable grip

- The edge-to-edge, bezel-less screen design of the Honor FullView Display brings a 75.5% screen-to-body ratio to the Honor 7A, which allows you to enjoy striking views on this sleek and compact smartphone. It keeps a comfortable grip with thickness of just 7.8 mm while bringing you a 18:9 wide screen.
- The Honor 7A comes with a one-touch split screen function to let you multitask with ease. Other functions like double-clicks to turn on and off the screen, navigation dock button and three-finger screen capture allow you to use and navigate your phone with great convenience.
- The 18:9 screen of the Honor 7A lets gamers to see even more on the screen. It is also close to the 21:9 ratio used by cinemas, offering you immersive movie experience.

5. Outstanding Performance – boost your experience

- The Honor 7A is powered by an octa-core processor and equipped with EMUI8.0. The smart UI (user interface) keeps the system running at an optimal level, providing good performance in multitasking and gaming.
- EMUI 8.0 enables useful features such as simplified interface which simplifies phone setup and artificial intelligence that optimizes phone performance according to user's habit. It also provides quick shortcut menu from App icons that speeds up operations, recycle bin for gallery to avoid deleting photos accidentally, and the ability to link up two Bluetooth devices.
- Three independent card slots allow you to use two SIM cards and a SD memory card at the same time. The expandable storage goes up to 256GB.

6. Party Mode – share music with friends wherever you go

- The Party Mode² feature allows you to connect up to nine smartphones together via WiFi and play the same music simultaneously. It greatly improves the surround sound effect and produces a truly immersive music environment.
- The Honor 7A has 30% more space for the higher power speaker compared to the previous generation. It plays music at the volume up to 87dB while keeping soft quality even in high volume. It is an ideal audio device in your pocket.

² Party Mode feature will be provided in a later update

- Honor's Histen audio technology provides three effects: near effect (like wearing an ear bud), front effect (like in a theater) or wide effect (like in a concert hall). With Party Mode, smartphones can play different tracks of the same song when connected. You can explore, invent & share music with friends, unlocking brand new music experiences.
